

**Notes from Sara Stamp's work session with Steering Committee, December 10, 2009  
Rosewell, Virginia**

What is focus of the YRSCB Roundtable?

Education

Collaboration

SWCD's – ag and urban issues

PDC

VIMS

Counties

Generally, groups tend to form out of crisis, like the Dragon Run group

But there does not have to be this in order to do good work and fill in the gaps

Is there a crisis now? TMDL, Impairments: regs. associated with agriculture

What is the driver to get people to invest?

Managing state regulations and requirements

Collaboration needed btw. state agencies

Need forum for citizen contact and neutral partnerships

Information sharing

Intra-level and Inter-level collaboration

Need technical assistance

Inter roundtable discussions may be useful, especially for the CB TMDL work

Need to share technical knowledge to implement required mandate

Use \$ to focus resources

We are missing more citizen representatives on Roundtable: landowners, watermen,

Friends groups (note: there are some friends groups, but are not that many in

watershed....we do have MPRA, FODR, Alliance)

We need to focus on engaging by issue and remain flexible with our work

We need to encourage development of Watershed Management Plans
